Keeping Your Debit Card Secure

- Check for obvious signs of tampering. If something looks different, such as a different color or material or the graphics are not aligned correctly, do not use that card reader and notify the owner or management.
- Wiggle everything, including the card reader. ATMs are solidly constructed and usually will not have parts that loosen. Also wiggle the card as it is inserted. PC Magazine reports that the skimmer needs the card to go in straight to read the data correctly, but most ATMs take the card and return it so the movement will not affect the transaction but could foil a skimmer.
- Cover your hand while entering the PIN number. Shielding the keypad with your free hand could protect your bank account.
- Use ATMs in busy locations. Scammers need time to install the skimming equipment and are less likely to take that risk if there are people around. ATMs inside banks and grocery stores are usually safer than those outside.
- Always review account statements for any suspicious activity. If you detect an unauthorized charge, notify your financial institution as soon as possible. Timely reporting of an unauthorized charge will mitigate your liability.

Can a dealer refuse to honor the warranty that came with your new car if someone else does the routine maintenance or repairs?

The Federal Trade Commission (FTC), the nation's consumer protection agency, says no. In fact, it's illegal for a dealer to deny your warranty coverage simply because you had routine maintenance or repairs performed by someone else. Routine maintenance often includes oil changes, tire rotations, belt replacement, fluid checks and flushes, new brake pads, and inspections. Maintenance schedules vary by vehicle make, model and year; the best source of information about routine scheduled maintenance is your owner's manual.
